

108 Ultrasonic Anilox Cleaner

Alkaline Cleaner for Ultrasonic Cleaning Machines

DESCRIPTION:

An aggressive and highly alkaline cleaner formulated for cleaning of UV and water-based inks from the anilox rollers. The product is designed to work on ultrasonic cleaning machines as well as for manual application. 108 Ultrasonic Anilox Cleaner loosens the ink particles from the micro anilox cells and initiates a sequestering action that prevents redeposition of debris during the cleaning process. This is an aggressive, highly alkaline anilox roller cleaner and should not be used where soft metals are present. Not for use on photopolymer material.

DIRECTIONS FOR USE:

For cleaning of cleaning of UV, Solvent based or water based inks, this can be used in concentrated form or diluted with water up to 50%. For hot Tank or Ultrasonic Units, dilute with up to 90% water. Set tank temperature to a maximum of 60 degrees Celsius.

READ SDS BEFORE USE. DO NOT ALLOW PRODUCT TO FREEZE.

AVOID CONTACT WITH SOFT METALS LIKE ALUMINUM. CORROSIVE LIQUID.

FEATURES AND BENEFITS:

- o Concentrated water based Alkaline product.
- o Thoroughly cleans micro cells of anilox rollers, rubber rollers as well as ink duct rollers and shop Floors.
- o VOC Free non-flammable product.
- o Compatible with photopolymer plates.

SPECIFICATIONS:

Appearance: Translucent Water Based Mixture

Solubility in water: Soluble in all ratios.

"Specific Gravity: 1.035 - 1.045 g/ml @ 25°C

Flashpoint: None

VOC: None

Odor: Detergent

pH: 12.5-13.0 (Concentrate)

Drying Speed: Not Applicable

PACKING

5 Ltr x 4
