

111 Ghost Buster

Ghost Image Remover for Blankets

DESCRIPTION

Impressions of the previously printed jobs left on the blanket become ink receptive and appear on the non-image areas of the subsequent jobs. The pressman is compelled to discard blankets prematurely causing losses to the establishment. The shopfloor personnel have coined the word 'Blanket Ghosting'. This issue has grappled the print establishments world over since it is virtually impossible to eradicate the problem with usual washes. 111 Ghost Buster is a novel product comprising of a blend of strong solvents and helps minimizing blanket ghosting and increases the blanket life. It has a quadruple action as it acts as ink remover, rejuvenator, deglazer and conditioner of rubber blankets.

DIRECTIONS FOR USE:

Take adequate quantity of 111 Ghost Buster on a cotton cloth and apply on the ghosting area. Let the product work on the surface for about 5 minutes. Wipe off with a clean cloth and clean with regular water miscible wash. This is a maintenance product and should not be used on inking rollers in running or idle condition. Application of this product on the blankets after executing a few jobs will keep the ghosting problem at minimal levels.

FEATURES AND BENEFITS:

Deep Cleans the blankets and opens up the pores of the rubber surface.
Removes impressions of the previous jobs from the blanket surface.
Multiple action product that revives the blanket.
