

510 Reviva Plus

Technical Data Sheet

Roller & Blanket Conditioner

DESCRIPTION

510 Reviva Plus is a Roller & Blanket Conditioner it is formulated to condition Nitrile Butadiene (NBR) rubber compounds. This is a medium evaporating product that allows the product to act on the rubber surfaces or a desired duration before evaporating. The product helps the rubber surfaces to regain their oleophilic properties. The application of this product is recommended when switching from conventional to UV Inks and vice versa.

DIRECTIONS FOR USE:

When switching from conventional to UV inks, perform the usual ink wash-up procedure as regular. Once the inking train is completely dry, pour the product neat on the inking roller train and allow it act on the rubber surface for a few minutes. Wash once with the regular press wash and clean the system well before commencing the printing.

FEATURES AND BENEFITS:

- Helps improve the receptivity of conventional and UV Inks.
- Helps ensure stable in water balance on the press.
- Prevents piling of inks on rubber surfaces.

SPECIFICATIONS:

Appearance: Clear colourless to yellowish liquid with hydrocarbon smell

Boiling Range: 150 - 200°C

Specific Gravity: 0.835 - 0.845 g/ml @ 25°C

Volatile contents: Approximately 95% w/w

Solubility in water: Emulsified.

Viscosity: Approximately 1.25 cSt @ 20°C

Flash Point: 34.4°C Tag Closed Cup ASTM D56

HMIS RATING

HEALTH	1
FLAMMABILITY	1
REACTIVITY	1
PERSONAL PROTECTION	B

PACKING

1 ltr x 15
